

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re PATENT application of:

Applicant(s): Jakob Egli
Serial No: 10/527,019
Filing Date: March 8, 2005
Title: PRESSURE DAMPER AND SILENCER, IN PARTICULAR FOR
CONNECTIONS OF SANITARY FITTINGS

Examiner: Patrick F. Brinson
Art Unit: 3754
Docket No. WOLFP0118US

SUBSTANCE OF INTERVIEW

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In compliance with MPEP 713.04, it is hereby confirmed that the substance of the interview on September 29, 2008 is accurately reflected in the interview summary record.

The identification of two Japanese patent documents on the notice of references cited accompanying the notice of allowance is noted. These documents were mentioned during the interview, along with a third Japanese patent document No. 42-004283. It was noted that the three documents were cited during prosecution of a parallel Japanese patent application based on PCT/EP2003/09902. It was further noted that the Japanese document not listed in the Notice of References Cited is similar to a reference already of record in the application and believed to be cumulative. The reference in question is U.S. Patent No. 2,495,693, which on the Notice of References Cited identified the inventive entity as Wilbert Annis et al. whereas the correct inventive entity is Byrd et al.

Respectfully submitted,
RENNER, OTTO, BOISSELLE & SKLAR, LLP
